EXPERIENCE

Software Developer Student

Boise Codeworks

- Completed 500+ hours of coding experience, completing over 20 projects in 13 weeks
- Efficiently worked with teams applying SCUM and agile principles.
- Developed RESTful APIs and databases using JavaScript, C#, Dotnet, MongoDB, MySQL, and Auth0

APPLICATIONS

Trackr

Full-Stack Web Application

- Worked with four other developers over the period of two weeks to create a full stack application in which users can track their scores in various different games and compare scores using a leaderboard system
- Worked on both the front end, using Vue.js, and the back end API using MongoDB and JavaScript.
- The team used SCRUM and Agile principles to ensure that we were able to deliver a quality product within the appointed time period

Instahooman

Full-Stack Web Application

- Worked with a small team of developers to complete a full-stack social media style application.
- Started and completed during a hackathon, a 15-hour spirit of development
- Built our own backend using Node.js and MongoDB, and the front end using the MVC framework
- The team used partner programming and SCUM principles in order to delegate our time most effectively.

SKILL

- JavaScript
- Vue.js
- HTML
- CSS
- MySql
- C#
- MongoDB
- Node.js

EDUCATION

Codeworks (2022)

Full Stack Development Student
Certificate of Completion

ABOUT ME

Passionate Full Stack developer who is well versed in multiple languages, and frameworks. Continuously pushing myself to learn something new, and gaining growth as a developer. Experienced with working on a team of developers using SCRUM and Agile principles. Eager to join a company to develop cutting-edge software and technology.
