EXPERIENCE

Software Developer Student
Boise Codeworks
July 2022 - October 2022

- Completed 500+ hours of coding experience, completing over 20 projects in 13 weeks
- Efficiently worked with teams applying SCUM and agile principles.
- Developed RESTful APIs and databases using JavaScript, C#, Dotnet, MongoDB, MySQL, and Auth0

Software Developer
RhinoStack
January 2023 - Current

- Developed and maintained scalable, secure applications for optimal performance and user experience
- Contributed to on-time and within-budget delivery of complex software projects in a cross-functional team.
- Applied a client-centric approach to develop and implement enterprise-level software solutions
- Developed and maintained high-performance applications using C# .NET Framework, JavaScript, Vue, and SQL, ensuring data integrity and user satisfaction.

APPLICATIONS

Keepr
https://github.com/garrett-adamss/keepr

- Developed a full-stack application over the course of a week. The application allowed users to share photos with each other, and save photos to personal collections on their own profiles.
- Used **Vue.js** to implement a responsive masonry layout for desktop and mobile.
- Wrote the back-end API using **C#** and **MySql** for the data storage

SKILLS

- JavaScript
- Vue.js
- HTML / CSS
- SQL
- MySQL
- C#
- MongoDB
- Node.js

EDUCATION

Codeworks (2022)
Full Stack Development Student
Certificate of Completion

ABOUT ME

Highly motivated Full Stack developer with a genuine enthusiasm for various programming languages and frameworks. Committed to continuous learning and personal growth, I thrive on exploring new technologies and expanding my skill set. Proficient in collaborating within SCRUM and Agile environments, working alongside talented development teams. Driven to create innovative software solutions and stay at the forefront of evolving technologies.
